

Consolidated Invoicing

What it is

Grouping multiple work orders into one invoice, for a single client, over a specified period of time to provide a streamlined customer experience.

Client Invoicing Challenges

Consolidated Invoicing in manufacturing can be a costly, time-consuming process as multiple parties have to find and share documents that are usually spread across multiple systems. In this type of environment costs can be up to 20x higher than they would be if the organization had process automation.*

*according to an AIIM report

Proposed Solution

- Quickly and easily implement RhinoDox to:
- Create a digital repository for work orders and invoices.
 - Automate work order and invoice consolidation processes.
 - Implement a portal to track the status of work orders.

Benefits

- Automatic work order tracking.
- Centralized, easily searchable documents.
- Reduced time for invoice consolidation.
- Reduced accounts receivable past due ratio.
- Faster payment receipt and recognition.
- Greater transparency internally and externally.

Better Information, Better Decisions.
